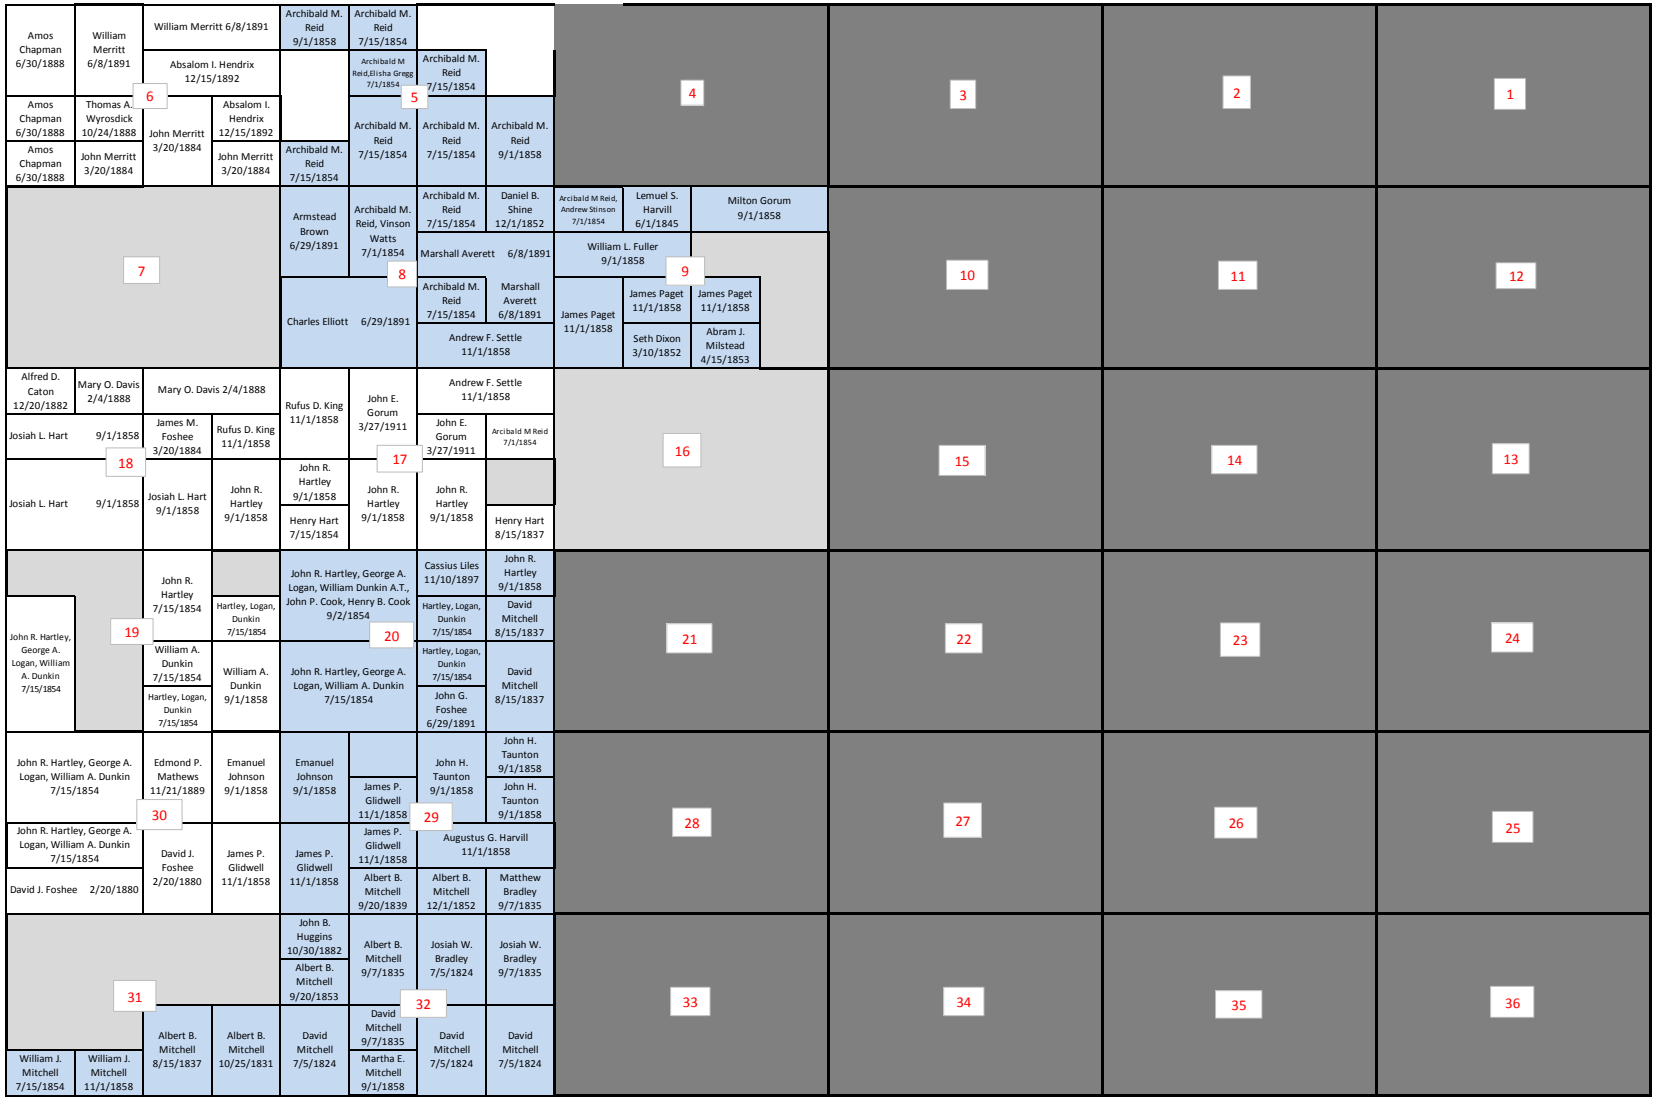
Original Land Sales Conecuh County Alabama , Township 5N Range 14E (Cohasett area)


This is a different way to look at the original land sales in an area. This can let you see who your relatives neighbors were. It can lead to clues in relationships and marriages or when a family arrived in an area. The areas shaded in gray did not have any purchase recorded. This information was taken from http://www.glorecords.blm.gov/default.aspx and the original images are available here at no cost. These imagines can give information as to a previous residence in some cases. For example, a deed in this county might be issued to John Smith, of Montgomery County, Georgia. This immediately tells you where John Smith lived before coming to this county. The dark shaded areas are part of Covington County. The blue shaded areas are the sections that contain the county line between Covington & Conecuh.
